FOP-LAB-TASK

Task:

Write your First C++ Program.

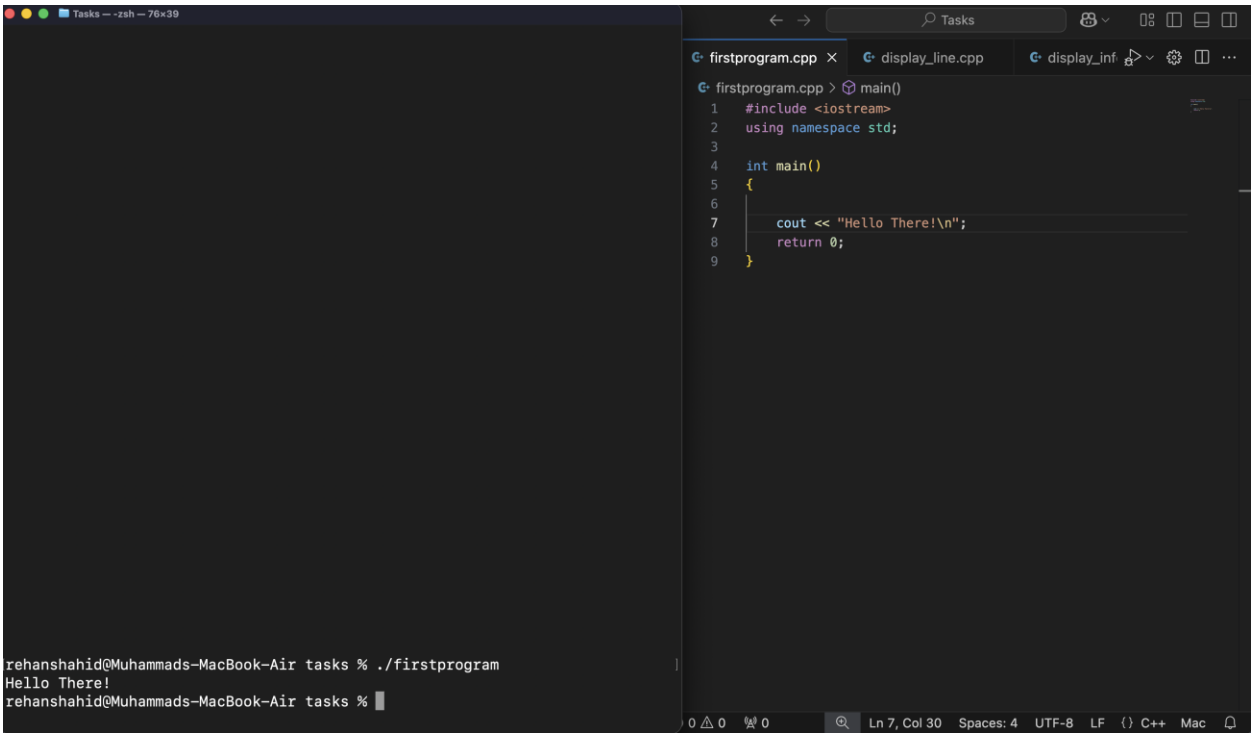

Program:

```cpp
#include <iostream>
using namespace std;

int main()
{

cout << "Hello There!\n";
return 0;
}
```

Output:

Task:

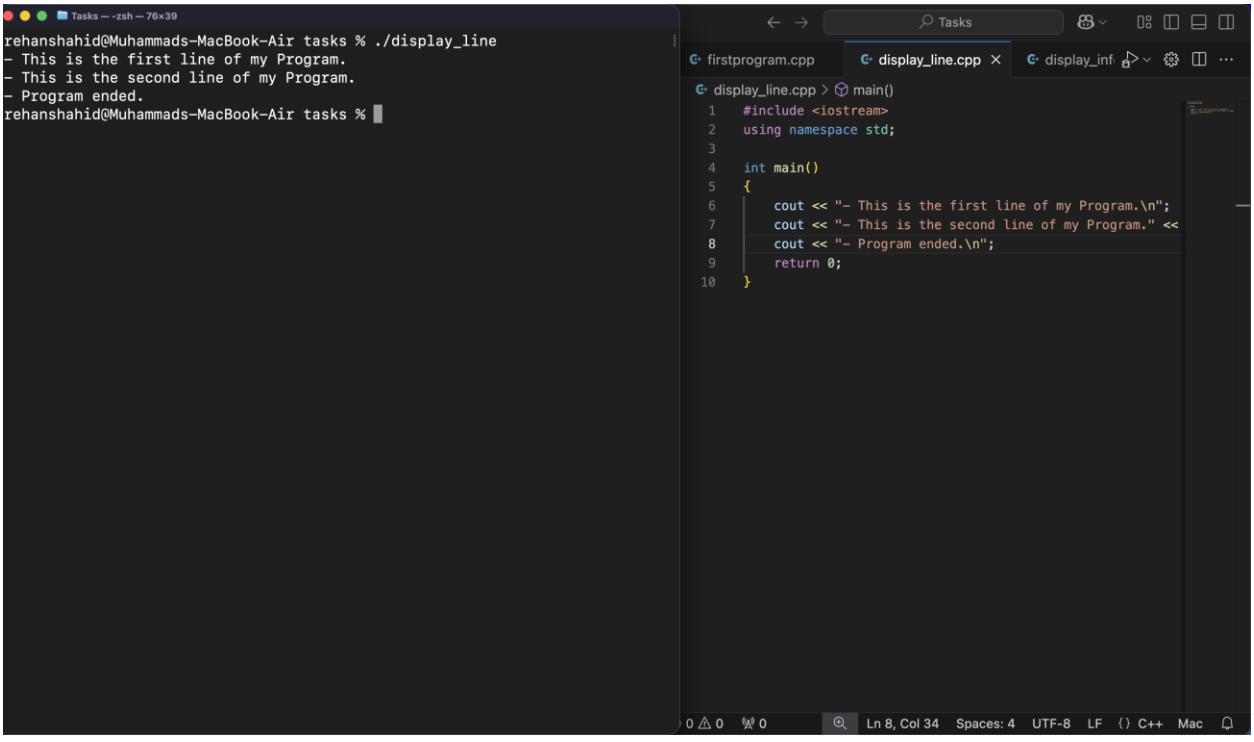

Display some lines using cout.

Program:

```cpp
#include <iostream>
using namespace std;

int main()
{
cout << "- This is the first line of my Program.\n";
cout << "- This is the second line of my Program." << endl;
cout << "- Program ended.\n";
return 0;
}
```

Output:

Task:

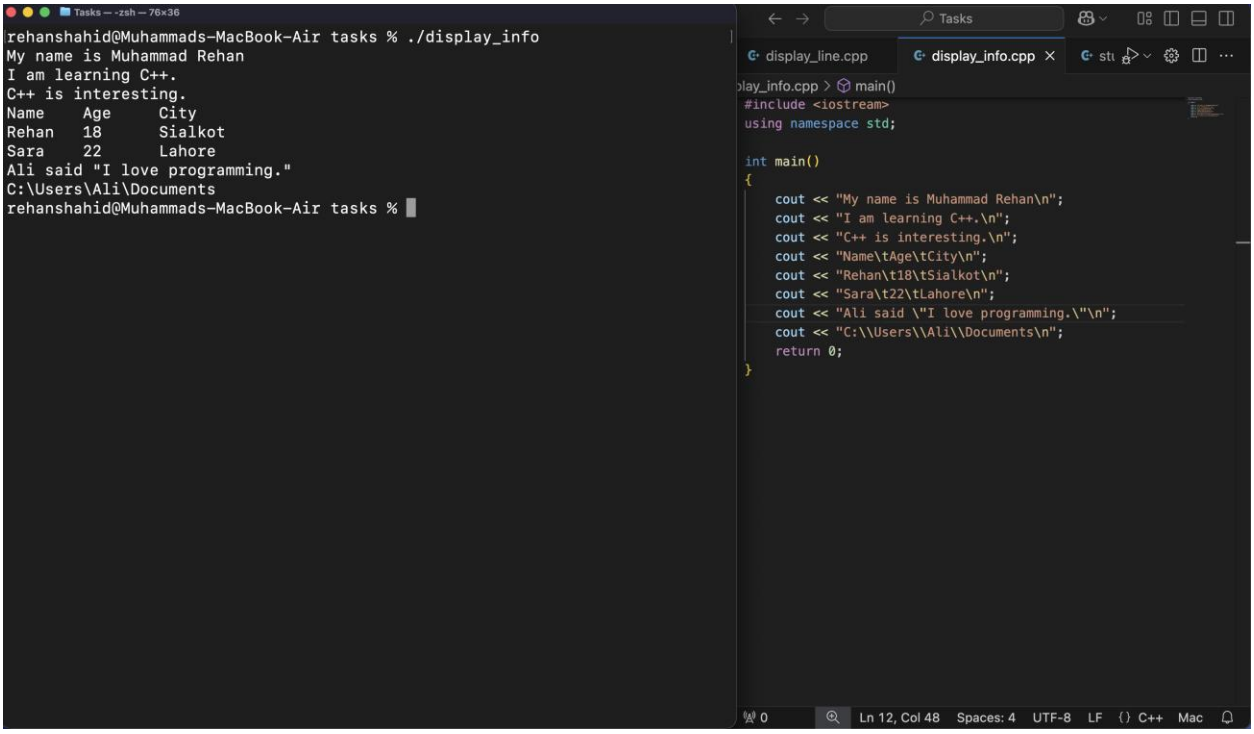

Display using cout and escape sequence.

Program:

```cpp
#include <iostream>
using namespace std;

int main()
{
cout << "My name is Muhammad Rehan\n";
cout << "I am learning C++.\n";
cout << "C++ is interesting.\n";
cout << "Name\tAge\tCity\n";
cout << "Rehan\t18\tSialkot\n";
cout << "Sara\t22\tLahore\n";
cout << "Ali said \"I love programming.\"\n";
cout << "C:\\Users\\Ali\\Documents\n";
return 0;
}
```

Output:

Task:

Display Student Information using cout and escape sequence.

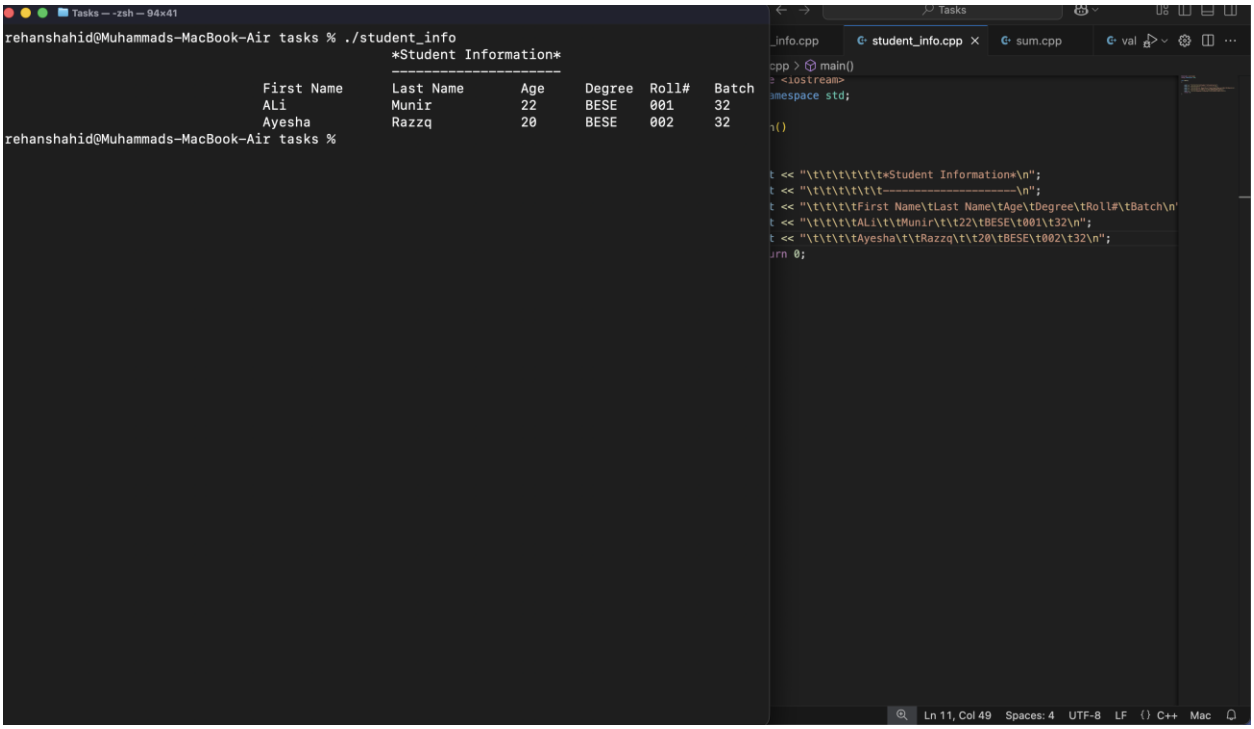

Program:

```cpp
#include <iostream>
using namespace std;

int main()
{

cout << "\t\t\t\t\t\t*Student Information*\n";
cout << "\t\t\t\t\t\t----------------------\n";
cout << "\t\t\t\tFirst Name\tLast Name\tAge\tDegree\tRoll#\tBatch\n";
cout << "\t\t\t\tALi\t\tMunir\t\t22\tBESE\t001\t32\n";
cout << "\t\t\t\tAyesha\t\tRazzq\t\t20\tBESE\t002\t32\n";
return 0;
}
```

Output:

Task:

Declare variables, ask input from user using cin and then add those input integers.

Program:

```cpp
#include <iostream>
```

```cpp
using namespace std;

int main()
{
//Declare variables two get two input from user to do sum
int a, b;
cout << "Enter number a:\n";
cin >> a;

cout << "Enter numnber b:\n";
cin >> b;

cout << "Sum is: " << a+b << "\n";

return 0;
}
```

Output:

```
rehanshahid@Muhammads-MacBook-Air tasks % ./sum
Enter number a:
45
Enter numnber b:
34
Sum is: 79
rehanshahid@Muhammads-MacBook-Air tasks %
```

Task:

Declare int, float and char variables and ask the user to input and then display the entered value.

Program:

```cpp
#include <iostream>
using namespace std;
```

```cpp
int main()
{

int a;
float b;
char c;

cout << "Enter an integer:\n";
cin >> a;

cout << "Enter a floating number:\n";
cin >> b;

cout << "Enter a character:\n";
cin >> c;

cout << "Your entered integer is: " << a << "\n";
cout << "Your entered float is: " << b << "\n";
cout << "Your eneterd char is: " << c << "\n";
return 0;
}
```
